Dear Ms. Januszkiewicz and Ms. McDowell:

**Re: Initial Source Testing  
Environmental Compliance Approval Number 7306-8FDKNX**

Further to the discussions between staff from the Ministry of the Environment and Climate Change, Regions of Durham and York and Covanta Durham York Renewable Energy, L.P, facility wide modifications at the Durham York Energy Center are required prior to achieving normal facility operations.

These modifications will require a facility outage for a period of approximately three weeks commencing on or about July 13, 2015, which will delay facility commissioning and the completion of the initial source test.

As the purpose of source testing is to produce accurate, reliable and representative emission data, source testing should be completed during normal facility operations.

I understand that normal facility operations are anticipated to occur by October 2015. Consequently, the initial source testing should be completed during December 2015.

Should you have questions, please contact Philip Dunn at 905 427 5627 or [philip.dunn@ontario.ca](mailto:philip.dunn@ontario.ca)

Regards,

Lubna I. Hussain, P.Eng.  
Manager, Technology Standards Section
